

REMARKS/ARGUMENTS

In response to the Examiner's further Office Action of April 11, 2008 the Applicant respectfully submits the accompanying Amendment of the abstract and claims, and the below Remarks.

Regarding Amendment

In the Amendment:

the abstract is amended to be in proper form by omitting "comprising";

independent claim 1 is amended to specify that the cartridge has print media feed means arranged to couple with drive means of the digital photofinishing system, and an opening arranged to enable a roller of the digital photofinishing system to contact the roll of print media, where the print media is fed through the printer by operation of the roller on the roll of print media and the coupled drive and print media feed means. Support for these amendments can be found in original claims 17, 19 and 20 and at page 14, line 19-page 15, line 12 of the present specification;

dependent claim 17 is cancelled; and

dependent claims 19-21 are amended to conform with amended claim 1.

It is respectfully submitted that the Amendment does not add any new matter to the present application.

Regarding Election/Restrictions

It is respectfully submitted that by the amendments of dependent claims 19-2, these claims are directed to the elected species.

Regarding Specification Objections

It is respectfully submitted that the amendments of the abstract to be in proper form provides the correction required by the Examiner.

Regarding Non-Statutory Double Patenting Rejection

It is respectfully submitted that the subject matter of amended claim 1 is patentable over claim 1 of copending Application No. 10/760,180, because none of these claims of Application No. 10/760,180 teach or suggest a cartridge having print media feed means which couples with drive means of a photofinishing system and an opening through which a

roller of the photofinishing system contacts a roll of print media of the cartridge, where operation of the roller on the roll of print media and the coupled drive and print media feed means feeds the print media through a printer, as is required by amended claim 1.

Regarding 35 USC 102(b) Rejections

It is respectfully submitted that the subject matter of amended independent claim 1, and claims 19-21 dependent therefrom, is not disclosed by Silverbrook (US 2002/0093569), because Silverbrook does not disclose or suggest a cartridge having print media feed means arranged to couple with drive means of the digital photofinishing system and an opening arranged to enable a roller of the digital photofinishing system to contact the roll of print media, where the print media is fed through the printer by operation of the roller on the roll of print media and the coupled drive and print media feed means, as is required by the claimed invention.

It is respectfully submitted that all of the Examiner's objections and rejections have been traversed. Accordingly, it is submitted that the present application is in condition for allowance and reconsideration of the present application is respectfully requested.

Very respectfully,

Applicant/s:
